

**Mossack Fonseca & Co: position in light of search of
the Parque Lefevre warehouse**

Mossack Fonseca & Co. wishes to state its position with regard to the search carried out by the prosecutor's office at the Parque Lefevre warehouse.

As part of our processes, all the group's files are digitalized on a recurrent basis. Therefore, the documentation held at the warehouse is information that the prosecutor's office holds as a result of the past ocular inspect carried out.

What was taken away by the prosecutor's office is material that was designated for recycling, according to how old it is, which is our company's usual practice.

Mossack Fonseca reiterates its willingness to cooperate with the ongoing investigation, such cooperation in this particular case being provided by the staff members that work in our warehouse.
